**Re: Water Main Extension Review / Water Service Approval**  
261 Gardner St – Hingham, MA – 3 Unit Sub Division

Dear Joseph:

The Weir River Water System has reviewed the water main extension plans and water service request for the above referenced project. Listed below are some changes and requirements of the WRWS. Installation of the water system assets are to be in accordance with the revised plans and specifications, the WRWS Rules and Regulations and approved construction standards.

1. The 6" DI water main must extend through the cul-de-sac and the hydrant positioned between Lot #3 and Lot #4.
2. Individual shut offs for each unit must be on the lot line for that unit
3. The water main on Gardner St is asbestos concrete; therefore, a mechanical tee and include a three-valve cluster.
4. Individual service applications to be completed for each unit and submitted for review.

**This letter confirms that at this time the Weir River Water System has sufficient water supply to meet the projected water demand as noted and serves as formal approval to proceed upon receipt of revised plans.** This commitment is valid for twelve (12) months from the date of this letter and if is not under construction or ready for service (intended usage) within 12 months, then our ability to serve your project will have to be re-evaluated.

Please note that final approval of this project is contingent upon the completion and fulfillment of all Weir River Water System requirements as outlined in the Rules and Regulations and a final inspection by our department. Should you have any questions please feel free to contact me at 781-804-2304 or [tierneyr@hingham-ma.gov](mailto:tierneyr@hingham-ma.gov).

Warmest Regards,
