Subject: RE: 199-201 Ward Street

Michael,

Attached are the revised plans for 210 Ward Street:

- Trees over 6" in diameter have been added to the Plan Set. As I mentioned before, a large portion of the lot was clear cut, so not a lot of large trees were left on site. Only those trees within the proposed work area were located, larger trees may exist closer to the Plymouth River to the South.
- As a result of the comments from the Board of Health last week, the conventional yield Plan has been changed. It now shows perk tests or an existing septic system on each of the three lots.

I'll forward 2 hard copies to you, let me know if you need anything else.

Thanks,

Merrill  **Brendan P. Sullivan, P.E., P.L.S.** | Director of
Engineering and Land Survey
