Re: Request for COC – DEP FILE #: 034 – 1470

Dear Members of the Hingham Conservation Commission,

I am writing to formally request a **partial Certificate of Compliance** for the project located at **23 Beach Road, Hingham, MA**, as permitted under the Order of Conditions issued pursuant to the Massachusetts Wetlands Protection Act (M.G.L. c. 131, §40) and the Town of Hingham Wetlands Protection Bylaw.

The project, which included the construction of a pile supported pier, gangway, and float system, has been completed in full and in accordance with the approved plans and conditions outlined in the original Notice of Intent, with the exception of:

1. MA DEP added the requirement for public stair access; these are in place and are a deviation from the OOC's and site plan that was approved by HCC.
2. All required salt marsh plantings and restoration measures outlined in the Order of Conditions have been installed and are in good condition as of this request. We are only one growing season into this and will request a full COC later that year towards the end of the Fall season.

Thank you for your attention to this request, and I look forward to your confirmation.

Sincerely,

Joseph Hannon P.E
