Re: Alliance Project Secondary Emergency Access Roadway

I have reviewed the letter dated April 22, 2017 from the Mullens at 39 Backriver Rd. I offer the following comments. The applicant Alliance has worked very closely with the Fire Dept throughout the process to ensure that public safety needs were being met. The currently proposed location for the secondary emergency access to the development is our preferred location. The reason for this is that it reduces any redundancies with the primary emergency access at the front of the property. Furthermore the originally proposed location would limit emergency access due to the number of trees and other obstructions. Lastly at the request of the Fire Dept Alliance provided engineered drawings showing appropriate turning radius for fire apparatus.

Respectfully,

Lieutenant Chris DiNapoli
Town of Hingham, Fire Marshal
