			Intrusive									
							Intrusive					
			Intrusive									

Notes:

1. Activities in red require the establishment and maintenance of safety zones. During these activities the public will not be allowed inside the active safety zone.
2. HFD = Hazardous Fragmentation Distance
3. The safety zones (HFD) shown on the map are based on the full extent of the underwater intrusive investigation area. As dig locations are finalized, the map will be adjusted and safety zones will only be in effect for those areas where investigations are occurring.
